DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Friday, 28 June 2024 at 05:35 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are expected to remain Low on Friday. This is due to the breeze, strong across northern areas, along with any showers, helping to prevent the build-up of any pollutants.

Tomorrow: Light winds, and sunny skies will bring the potential for pockets of Moderate levels to develop, mainly in urban centres across southern and eastern England. Low levels are expected elsewhere.

Outlook: Changeable, and often cool weather is expected to continue through the outlook period. This will ensure air pollution levels remain Low across the UK.
